Portfolio: kennydev.netlify.app

Experienced Full-stack software developer with 2 years of experience in writing robust and high-quality code for mobile and web applications for high-volume businesses. Have good communication, problem-solving, adaptive, and understanding skills. A logical thinker and so good at project management and modularization.

Experience

June 2020 - Aug 2020

Intern Web Developer
PEFSCOM System Company

- Getting acquainted with building company standard websites.
- Learn the difference between qualitative and quantitative UI/UX designs.

July 2021 - Sept 2021

Intern Software Developer
PaveWay Technologies

- Learn real software problem-solving skills.
- Address and solve software problems, from requirements gathering to feasibility studies to architecture to design.

June 2022 – Till date

Full Stack Developer
AfroVision Group

- Build websites and mobile applications' front-end and back-end and their interactions with each other.
- Worked with a team of developers on large projects, managed by experienced lead developers.
- Build complete websites with all interactions solely.
- Always assure that my codes are modularized for easy refactoring and maintenance of coding and always keep track of code quality.

Education

2019 – 2022

University of Buea, Cameroon, BTech, Software Engineering

- Defended my BTech project, "*Online Private Tutor Finder*" built with the MERN stack.
