PROFILE

Experienced Full Stack Developer with a strong command of a diverse set of programming languages and tools. Proficient in both backend and frontend development, I seamlessly navigate every stage of the development process. I'm a collaborative team player who brings exceptional technical skills and a track record of 4+ years in software development. My expertise lies in crafting and designing web applications using a wide array of technologies, such HTML, CSS, JavaScript, Vue.js, React, Flutter, and Laravel. I excel in building intricate backend systems, robust web and mobile services, and database solutions.

EXPERIENCE

Full Stack Web Developer
Upwork / March 2019 – Till Date

- Leveraged a comprehensive skillset, including JavaScript, Bootstrap, Laravel, and HTML, to deliver cutting-edge web solutions for diverse clientele.

- Collaborated closely with clients to ensure a deep understanding of their needs, resulting in customized and effective software products.

- Consistently delivered projects on time and within budget, maintaining a track record of client satisfaction and positive feedback.

Full Stack Developer
AfroVision - Buea, Cameroon / January 2022 – December 2023

- Played a pivotal role in ensuring code quality by meticulously reviewing, debugging, and rectifying issues, enhancing the overall reliability of software products.

- Collaborated actively in the requirements gathering process, contributing valuable insights to clarify prerequisites and identify optimal technical solutions aligned with business objectives.

- Translated the organization's design mockups into pixel-perfect front-end web and mobile application user interfaces (UI) using an extensive skill set encompassing HTML, CSS, JavaScript, TypeScript, Bootstrap, Tailwind CSS, jQuery, React.js, Vue.js, and Flutter.

- Assumed a key role as a back-end developer, designing API endpoints for both mobile and web applications, harnessing the power of Django and Laravel frameworks to ensure seamless functionality and data flow.
